Note: Details may not sum to totals due to rounding. Initial release does not refer to first-time offenders but to offenders' first release from a given sentence (whether they are first-time offenders or not), as opposed to a re-release after a subsequent parole violation. Statistics are based on 44 states, and data exclude state prisoners with sentences of one year or less; those with missing values for most serious offense or calculated time served; those released by transfer, appeal, or detainee; and those who escaped. Data include 3,266 deaths in 2018.

~Not applicable.

^aExcludes time served in jail.

^bThe statistical median represents the value at which 50% of the values are larger and 50% are smaller in a sequence of numbers.

^cIncludes unspecified and other homicides.

^dIncludes extortion, intimidation, and blackmail.

^eIncludes hit and run with injury and other unknown violent offenses.

^fIncludes forgery and embezzlement.

Note: Details may not sum to total due to rounding. Categories cumulative through <20 years (e.g., <1 year includes <6 months). First release does not refer to first-time offenders but to offenders' first release from a given sentence (whether they are first-time offenders or not), as opposed to a re-release after a subsequent parole violation. Statistics are based on 44 states, and data exclude state prisoners with sentences of one year or less; those with missing values for most serious offense or calculated time served; those released by transfer, appeal, or detainer; and those who escaped. Data include 3,266 deaths in 2018.

^aFor initial release with average time served of less than 6 months, deaths accounted for 6.0% of murder "releases," 1.4% of manslaughter "releases," 2.4% of rape "releases," and 2.1% of other sexual assault "releases" in 2018. Deaths made up less than 0.5% of all other offense categories.

^bFor initial release with average time served of less than one year, deaths accounted for 9.0% of murder "releases," 1.5% of manslaughter "releases," 3.3% of rape "releases," and 7.4% of other sexual assault "releases" in 2018. Deaths made up less than 0.4% of all other offense categories.

^aAverage sentence length reflects the total maximum sentence that prisoners received. Sentences of more than 100 years, including life sentences and death sentences, are set to a maximum sentence of 100 years.

^bAverage percentage of sentence served is the percentage of the maximum sentence served before the first release and excludes time served in jail. In cases of death, percentage of sentence served equals 100%. Including life sentences, death sentences, and deaths has little effect on offenses apart from murder. If they were excluded, then the average sentence for murder would be 20.2 years and the percentage of time served for murder would be 53.6%.

^cIncludes unspecified and other homicides.

^dIncludes extortion, intimidation, and blackmail.

^eIncludes hit and run with injury and other unknown violent offenses.

^fIncludes forgery and embezzlement.

^gIncludes receiving and trafficking of stolen property, destruction of property, trespassing, and other unknown property offenses.

^hIncludes forging prescriptions, possession of drug paraphernalia, and other unspecified offenses.

ⁱIncludes DUIs/DWIs; court offenses; commercialized vice, morals, and decency offenses; liquor law violations; and other public-order offenses.
